## COLOSSAL PERFORMANCE & CONTROL

The MDM Sequence® product family introduces the Colossus 750 DC+, a compact, speed controllable, 7000 gallons-per-hour pump offering direct as well as remote control through third party Internet of Things (IoT) modules. The recent Colossus impeller technology boasts a 16% increase in flow over the synchronous speed legacy impeller designs. Now with speed control capability and energy efficiency that comes with DC motor technology, the performance benefits address the ever-growing demand of high flow, low energy consumption, and small form factor.

719.634.8202 | [sequencepumps.com](http://sequencepumps.com) | Manufactured in Colorado, USA.  
Sequence® is a registered trademark of MDM Incorporated.

## FEATURES

- 7000 Gallons Per Hour Max\*
- 39 Feet Max\*
- Wide Range Speed Control
- Quiet Operation
- Overload & Run-Dry Protection
- IoT Controller Ready
- Compact Footprint
- Five Year Warranty
