

 **SEQUENCE®**

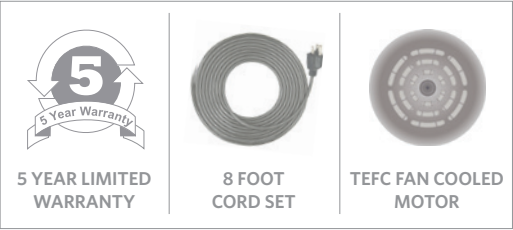

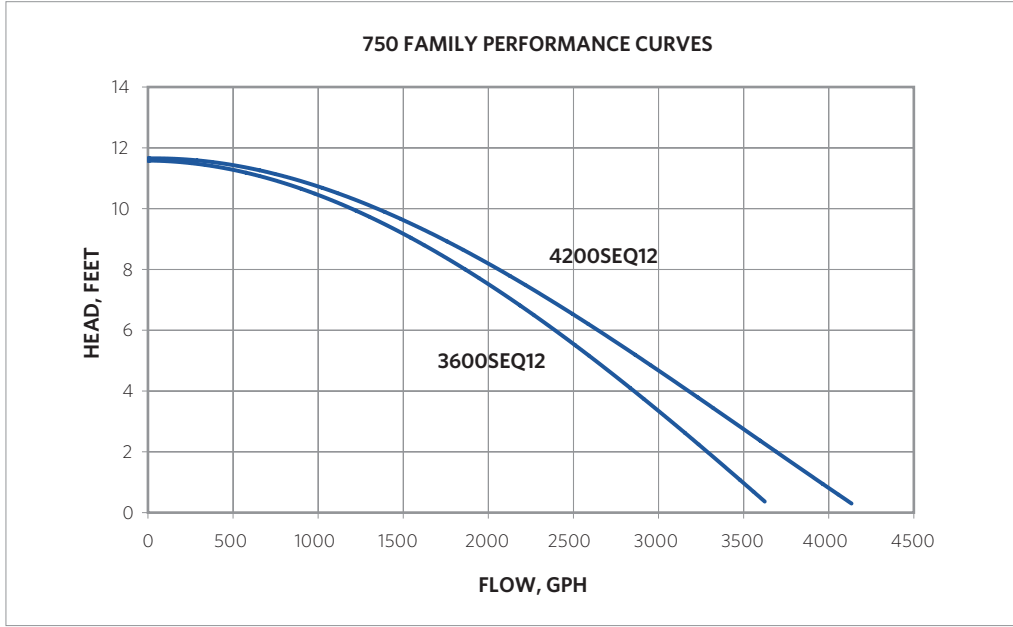

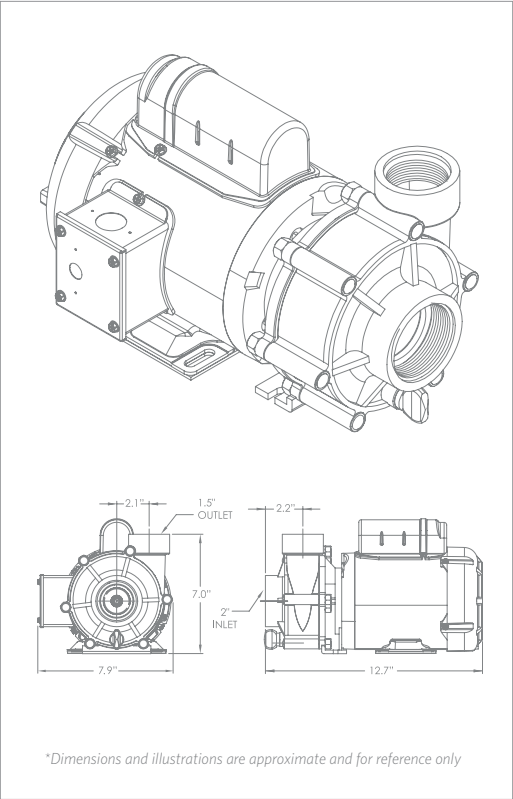

Efficiency and Longevity.

Sequence® 750 Series

Our best seller. The compact model 750 series delivers big flow for little power that's great for smaller and simpler ponds (3,000 gallons or less). The motor is totally enclosed fan cooled for durability and 115V only. It is supplied with an 8 foot cord set and a five year limited warranty.

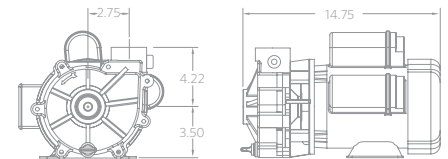

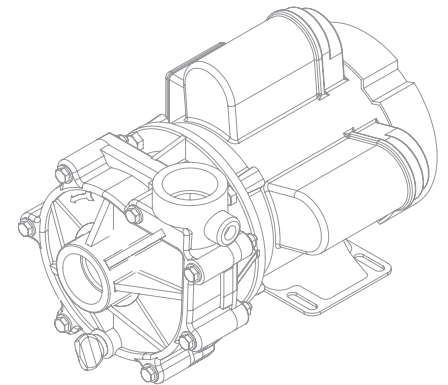

MODEL	INLET	DISCHARGE	MAX FLOW (GPH)	MAX HEAD (FEET)	MAX POWER (WATTS)	MAX CURRENT (AMPS)	@ (VOLTS)	MOTOR HP	MOTOR ENCLOSURE	IMPELLER

Sequence® 1000 Series

The Classic. The model 1000 series has set the standard by which all others are measured. This series is a perfect blend of medium pressure and ample flow for the majority of ponds. The motor is totally enclosed, fan-cooled for durability and 115V or 230V. It is supplied with an 8 foot cord set and a five year limited warranty.

Sequence® 4000 Series

Introducing the new Sequence® 4000. The expansive design meets today's increased market demand for performance on all levels. Each Sequence® 4000 model comes complete with 2" FNPT and buttress thread ports and unions for ease of use. It is also supplied with an 8 foot cord set and a five year limited warranty.

Sequence® Power 4000 Series

Our Power 4000 is built to support recirculation applications requiring flow rates above 8000 GPH at high head pressures. Achieving over 13,000 GPH and a max of 80 feet of head, the 4000 broadens the performance range in the Sequence® Power series. It is supplied with an 8-foot, 230V cord set and a five year limited warranty.

Sequence® Alpha Primer

The Alpha Primer series integrates a basket-type pre-filter and self-priming capabilities into one efficient package for trouble-free operation. The integrated strainer basket on all primer units helps protect the internal rotating parts of the pump from damage due to external debris being pulled into the pump. It is supplied with an 8 foot, 115V cord set and a five year limited warranty.

Basket Strainer (WW)

Our light duty WW model strainers are sold with either a 1.5" or 2" union adapter. All units come complete with an internal strainer assembly and gasket seals. Sequence® WW model strainers are designed, engineered, and produced in the USA.

SIZE	PART NUMBER	O-RINGS	MATERIAL
1.5" (90 CI)	1000.771-1	Buna	PVC/ABS/Lexon
2" (90 CI)	1000.771-7	Buna	PVC/ABS/Lexon

Basket Strainer (PF)

Our medium duty PF model strainers have a clear or gray PVC body and a basket made of stainless steel or acrylonitrile butadiene styrene (ABS). The standard port dimension is a 2" male thread that comes with adapters that have a slip port. With the PF model strainer you can expect higher quality molding processing, finer materials and excellent performance.

SIZE	COLOR	PART NUMBER	O-RINGS	MATERIAL
2" (500 CI)	Clear	24170488	Buna	PVC/ABS/SS
2" (500 CI)	Gray	24170496	Buna	PVC/ABS/SS

Basket Strainer (FT)

Our heavy duty FT model strainers are suitable for aquatics, general water and industrial applications. The standard strainers feature a unique seamless cast design that can be customized for Sequence® Titan pump applications requiring integral access ports and FTP stands. These basket strainers are available in corrosion-resistant plastics such as PVC, CPC, PP and PVDF, as well as fiberglass. All offer greater temperature resistance and chemical compatibility than traditional iron, steel and bronze strainers.

SIZE	PART NUMBER	CENTERLINE	MATERIAL
4x3"	24169627	5.25"	PV/CPC/PP/ PVDF/SS

Swing Check Valves

We offer three different sizes of swing check valves (1.5", 2" or 3") for applications with potential flow reversal. All units are made from 100% PVC with a rubber sealed flapper swing valve.

SIZE	PART NUMBER	MATERIAL
1.5"	MP-CV15	PVC
2"	MP-CV20	PVC
3"	MP-CV30	PVC

THE PEOPLE AT SEQUENCE® KNOW THAT YOUR PUMP IS AN INVESTMENT

Sequence® pumps are manufactured to quality standards that meet the most stringent of investment requirements. And just what is the most difficult investment standard to meet? The standard set by those who understand the true cost of ownership. True cost of ownership goes beyond the purchase price. When considering a pump for an aquatic system, longevity, efficiency, operating costs and ease of use must be considered when arriving at the actual cost of the investment.

In addition, the purchase of a Sequence® pump is an investment in the future. Since we choose to plow profits back into new product development, you can count on the fact that there will always be a new Sequence® pump in the future... and one that will be an even better investment.

Sequence® is the leader in high efficiency, external pumps for water features and koi ponds. From the compact model 750 and workhorse model 1000 to the self priming, integrated basket strainer and power series models, there is a pump for every application. All units are assembled and pre-tested in our Colorado manufacturing facility.
